Since 2007 LED Spectra unit develops led growlights that stimulate the most important plant processes to have a plant grow and flower. After the success of the special in 2010 the special II had been developed. The special II has 3 watt led to realize a more energy saving growing result. In 2013 the special III has been developed. With the LED Spectra unit special III growers can easily adapt the LED spectrum to the plant.

**EXCHANGABLE LED MODULES**

The LED Spectra Unit® special III is a compact led growlight making it easy to adjust the led spectrum with led modules for the growing process and led modules for the flowering process of the plant. The led modules have been developed for various plant processes.

**HIGH EFFICIENCY**

The energy saving LED Spectra Unit® special III has a 40% higher light power comparing to traditional led growlights. With a lower wattage a higher efficiency can be realized. You can connect multiple units to create a powerful led spectrum.

**START/ REGULAR / PROFESSIONAL**

The LED Spectra Unit® special III is available as; Start, Regular and Professional. In this the special III - professional can be compared with the special II - 628.

- Plug & Play
- Energy saving
- Fire Save
- Low heating dissipation
- Long life
- 2 year warranty
